- Linux

## EDUCATION

### Multimedia Engineering

Universidad Autónoma de Occidente  
2018 — 2023 · Cali, Colombia

## CERTIFICATIONS

- Docker
- Go (Golang)

Public credentials on LinkedIn

## PROFILE

Full Stack Developer focused on building scalable, high-performance, user-centered applications, with solid experience across frontend and backend. I work with JavaScript, TypeScript, React, Next.js, Angular, Node.js, Java, C#, Python, Go and Flutter to deliver robust web and mobile solutions. Committed to clean architecture, code quality and continuous improvement, leveraging AI tools such as Claude Code to solve real problems and build products with impact.

## EXPERIENCE

### Full Stack Developer · Simón Movilidad SEP 2025 — PRESENT

Bogotá, Colombia

- Build and maintain urban mobility web applications with **React** and **Go**, improving system performance and taking features from design to production.
- Lead full projects as the **sole developer** using **C#**, **React**, **Vite** and **Next.js**, owning both frontend and backend end to end.
- Adopted **React Native** to extend products to mobile platforms.
- Deploy applications from the **command line**, connecting to different servers and orchestrating environments with **Docker**.
- Boost my productivity and code quality by leveraging **AI tools like Claude Code**.

### Full Stack Developer · Globe Software JUN 2022 — SEP 2025

Montevideo, Uruguay (remote)

- Developed and maintained web and mobile products alongside cross-functional teams, covering the full stack.
- Delivered interfaces in **React** and **Angular**, and cross-platform apps with **Flutter**.
- Implemented backend services in **Node.js** and **Java**, ensuring reliable APIs and maintainable, tested code.
- Took part in code reviews and agile ceremonies, contributing to clean architecture and consistent quality standards.

### Full Stack Developer · DomicilioExpress.com

OCT 2021 — JUN 2022

Cali, Colombia

- Built features for e-commerce and delivery platforms, improving the end-to-end user experience.
- Optimized system efficiency and view performance, reducing load times under real traffic.
- Collaborated on frontend and backend tasks to ship customer-facing features.
